 Racial tape for broadcasting (Racal-Zonal) Nov: p 47
 Cassette racking (BASF) Nov: p 47
 Compact Super 8mm cameras (Johnsons of Hendon) Nov: p 47

AV → 58

It's called the X/136. And it turns the Rank Aldis Tutor 2 projector into one of the most versatile teaching aids you could wish for. The X/136 is a magazine attachment that holds 36 slides. It's easy to fix on (as easy as changing from filmstrip to normal slide use). There's a rotating knob at the side to give you both forward and backward control of the magazine — so you can select any individual slide any time you choose. You can show the slides in any order, repeating some, omitting others. Every click of the rotating knob lets you know that you've moved one slide forward or backward in the magazine.

A new magazine you should read all about.

The attachment takes the standard Aldis 36 magazine for 2 x 2 mounted slides. And it fits not only the famous Tutor 2 projector but the Tutor 1000 and Tutor 500 as well.

Please send me more information on the X/136 magazine attachment.
